PROFESSIONAL SUMMARY

Fullstack JavaScript Developer with 2+ years of experience delivering production web applications across React, Vue, and Nuxt ecosystems. Proven track record of leading framework migrations (Vue 2→3, Nuxt 2→3), implementing secure authentication flows (JWT, OAuth), and integrating third-party services including payment gateways and real-time messaging. Fluent in English (C1) with hands-on experience across frontend, backend, and DevOps — comfortable owning the full development lifecycle from UI to deployment.

WORK EXPERIENCE

Fullstack JS Developer | Freelance (Kwork)

Dec 2023 – Present

Hant Travel Agency — Next.js · Brevo · SSR [demo](#)

- Developed a responsive, SEO-optimized travel agency website with server-side rendering, a JSON-based dynamic product layer, and OTP-based email verification via Brevo.

Nebula GTS Platform — Nuxt 2 → Nuxt 3 · Vue · WebSockets · AWS S3 [demo](#)

- Contributed to a large-scale platform, building a custom multi-column admin interface for content management and an internal real-time messaging system using WebSockets and AWS S3.
- Identified performance and scalability constraints in the Nuxt 2 codebase, proposed and initiated partial migration to Nuxt 3; delivered all features under NDA/restricted-environment conditions.

Novicombank CRM — Vue 3 · Migration [demo](#)

- Led end-to-end migration of a client CRM platform from Vue 2 to Vue 3, improving application load times by ~25% and reducing technical debt by replacing deprecated libraries with the Composition API.
- Delivered post-migration feature updates and UI adjustments aligned with client business requirements.

Bar Karas — QR Menu Platform — React · Express.js · MongoDB · Yookassa · OAuth [demo](#)

- Built a full-stack QR menu platform supporting multi-restaurant and multi-table workflows, enabling customers to scan QR codes and complete payments via Yookassa integration.
- Implemented OAuth authentication via Yandex for simplified user onboarding in the Russian market.

Confidential Crypto Platform — React · Express.js · MongoDB · JWT

- Reduced fraud-related financial losses by ~40% on a live crypto platform by architecting an OTP-based transaction verification system via Telegram bot API, neutralizing an active exploit within 48 hours.
- Strengthened the admin panel by introducing JWT authentication with cookie-based session validation and temporarily restricting all financial flows to halt ongoing fraud.
- Implemented background automation using cron jobs to support system-level processes.

IT Mentor | Empire IT

Nov 2023 – Jan 2024

- Mentored 50+ junior frontend developers on Vue.js and React fundamentals, component architecture, and code quality best practices.
- Conducted regular code reviews, supported task planning and debugging, improving team delivery consistency.

Frontend Developer Intern | Programmer.uz

Jul 2023 – Nov 2023

- Joined a competitive Vue.js/Nuxt.js-focused internship, transitioning from a React background and rapidly adapting to SSR concepts, performance optimization, and SEO under strict deadlines.
- Independently rebuilt a complex Nuxt 3 project from scratch within one week despite no prior Nuxt/SSR experience; worked on commercial projects including LMS dashboards and web platforms.
